

Ring Sizer

For the best accuracy, use a ring with the same sort of band width to the one you would like to purchase.

* Print this page at 100% and check that the size of the line shown below is 4cm.

* Place your ring over the circles and move around until you find one that completely fills your ring but does not overlap it (you should do this with the internal part of the ring).

* Your ring size is shown by the letter within the circle

PLEASE NOTE: THIS IS INTENDED AS A GUIDE ONLY. THE BEST WAY WOULD BE TO HAVE YOUR FINGER MEASURED BY A PROFESSIONAL.
